Password Policy

According to the [LRZ password policy](#), passwords have to be changed *every 12 months*. We are aware that this action imposes extra work on our users. However, we consider this action to be indispensable for security reasons, carrying out respective recommendations of BSI (Bundesamt für Sicherheit in der Informationstechnik) and the standard IT security controls ISO/IEC 27001.

The current password of your account *adbk0045* is valid until **23.12.2020**. Of course, you may change it any time before. After each password change, it is valid again *one year*. You can look up the current date of expiry in the Self Services of IDM-Portal, clicking on "Person → view" or "Account → view". To avoid surprises with an expired password, we will remind you of the date of expiry by mail in time and request you to change your password. If you miss the date of expiry, it will be no trouble. Then your account will just be blocked until you log in to IDM-Portal and set a new password there.

Hints to use IDM-Portal

Using this web frontend you can configure your LRZ accounts and have a look at the personal information stored about you at the LRZ. Please select the appropriate item in the menu on the left.
